

# EcoRefurb | RECOMPRA

The tool that allows you to offer your customers an additional incentive to renew their technological equipment.

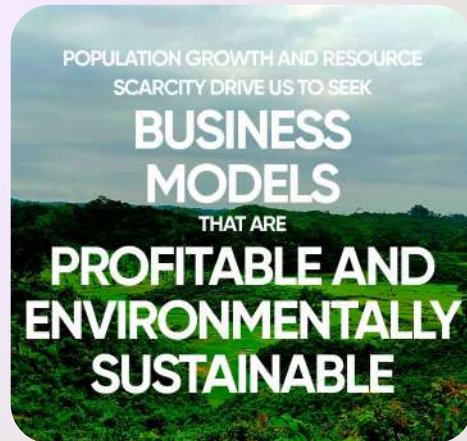

**RENEWING  
IS IN OUR  
NATURE**

# EcoRefurb |

Through the REcompra programme, EcoRefurb promotes the circular economy by repurchasing used equipment from its partners' customers, completing a cycle of reuse and refurbishment and giving the equipment a new life.

We provide our partners with a new source of revenue through the REcompra programme. With this programme, you can present your customers with an offer to trade in their old equipment, thereby encouraging an upgrade of their technology estate while promoting a more sustainable environment, and at the same time benefiting from an additional margin and a business enabler.

The mobile devices segment currently represents around €23 billion.

The trade-in market represented around €34 billion in 2025.

# OUR COMMITMENT

We provide you with increased margin through a new business stream that ensures a fully certified process:

**Sustainability Benefits Report:** The purpose of this report is to demonstrate the positive environmental impact that any company can generate by using WDMI's Refurbishment Service.

European company dedicated to the management of Waste Electrical and Electronic Equipment (WEEE), Battery Waste (BW), and Packaging Waste (PW)

ADISA certification is recognised by the United Kingdom Accreditation Service (UKAS). With two GDPR certification schemes approved by the Information Commissioner's Office, supported by a world-class testing laboratory and a dedicated research centre.

# WHY CHOOSE US?

Our innovative approach transforms used equipment into high-quality solutions, delivering competitive value that sets your company apart in the market.

We leverage existing assets to create new revenue streams, maximising the value of the equipment.

We generate more sales opportunities, helping to expand your brand's reach and increase sales volume.

Refurbishment ensures customer satisfaction with affordable and reliable products, fostering loyalty and encouraging repeat purchases through a guarantee of quality.

We ensure a safe, efficient, and transparent experience at every stage of the process.

Studies indicate that employee productivity can increase by up to 50% when using modern technological equipment, compared to using equipment that is around five years old.

USING THE RECOMPRA PROGRAMME TO  
**UPGRADE  
EQUIPMENT**  
ALLOWS ORGANISATIONS TO:

Increase team productivity

Comply with software security best practices

Free up budget to invest in other essential business processes.

Monetise old equipment, resulting in increased sales

Comply with legal and regulatory requirements, such as the Waste Electrical and Electronic Equipment (WEEE) Directive.

Standardise hardware and software, reducing complexity and the costs associated with IT support

**ALL IN ONE PLACE**
