

SUSTAINABILITY BENEFITS REPORT

At WDMI, we are on a journey of continuous reinvention in everything we do. Our goal is to improve the lives of all people, everywhere. At the heart of this transformation is a commitment to building a business that can generate a sustainable and lasting impact on the world and on all our partners.

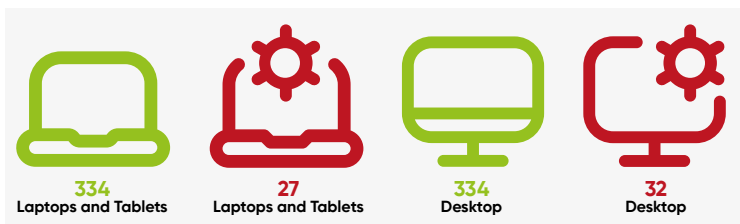

THIS REPORT WAS CREATED FOR:

Thank you for trusting WDMI with your used devices. Your commitment to sustainability is inspiring! We refurbish equipment to extend its useful life, contributing to the circular economy and reducing environmental impact.

By innovating in the design, production, delivery, repair, and reuse of our products, we promote more sustainable growth and more efficient use of resources. Partnerships like ours are essential to this transformation.

This report, based on Life Cycle Assessment (LCA) and Product Carbon Footprint (PCF), combines data from WDMI-EcoRefurb and the wider industry, including emissions from transport, distribution, sales, and storage.

REFURBISHED EQUIPMENT

● These devices are damaged; therefore, it was not possible to issue their data wipe certificate or ecological savings certificate. However, they will be destroyed in accordance with current environmental regulations.

By reusing and extending the lifespan of your old equipment, you helped avoid greenhouse gas (GHG) emissions. We calculate your savings in carbon dioxide (CO₂) equivalents.

To learn more about this type of calculation, please visit: www.ecorefurb.pt or contact our refurbishment centre at info@.ecorefurb.pt. The chart on the left represents the ecological savings by each category of refurbished products.

The purpose of this report is to demonstrate the positive environmental impact that any company can generate by using WDMI's Refurbishment Service. The values presented are estimates that reflect potential savings, based on the volume and categories of returned products, as well as widely recognised conversion factors. This report is for informational purposes only and should not be used to report official remanufacturing or recycling rates to third parties. WDMI makes no warranties regarding this information, except those expressly stated in the warranty terms of its products and services. Furthermore, the company accepts no responsibility for any technical or editorial errors contained in this document or across the entire value chain.
